

Applying Content

- Design Studio
- Advanced Design
- Manage Pages
- Read disclaimer and click OK
- Click “Create New Page”
- Type a page name (URL)
- Type a page title
- Choose a page layout
- Click “Create Page”
- In the properties box, add meta tags if necessary
- Save
- If your page is not highlighted in the Manage Pages grid, click the page and then click “Edit Page” tab
- Under the “Main” heading is where you will add your content modules
- Choose the content that is associated with the page you are building and drag it into an open module
- Drop it in the module (If the type of page you created was “News”, you can drag the editorial content, editorial content feed or text modules on the left into the page modules on the right)
- Choose a Market Group if necessary and a category
- Save
- To keep this content from showing on all pages of your site, keep the setting as “non-global” If you wanted this to show on all pages, change the setting to Global
- Preview your page
- Publish
